*Want to hear the facts about
stem cell research?*

Hear international ethics expert
Wesley Smith & stem cell expert
Dr David Prentice debate the facts with
Dr. James McInerney (NUIM)
and others

JH3, NUI Maynooth,

Wednesday

18th February, 7pm

SMITH

Wesley Smith is a renowned ethicist and self-described troublemaker - but he only makes trouble for those who deserve it.

PRENTICE

Dr David Prentice is an internationally recognised stem cell expert, who argues passionately against experiments on human life.

They'll present the facts: that embryonic stem cell research destroys human life and provides no cures. Adult stem cells, on the other hand, are providing treatments for 73 conditions to date, including cancers.

Hear the case against UCC's recent decision to begin experiments on human embryonic stem cell lines. And see who has the winning argument when it comes to lethal research on human life.
