*Want to hear the facts about stem cell research?*

Hear international ethics expert Wesley Smith & stem cell expert Dr David Prentice tell a few home truths to UCC

**BOOLE 2, UCC,  
TUESDAY**

**17th February, 7pm**

# SMITH

**Wesley Smith** is a renowned ethicist and self-described troublemaker - but he only makes trouble for those who deserve it.

# PRENTICE

**Dr David Prentice** is an internationally recognised stem cell expert, who argues passionately against experiments on human life.

**They'll present the facts: that embryonic stem cell research destroys human life and provides no cures. Adult stem cells, on the other hand, are providing treatments for 73 conditions to date, including cancers.**

Hear the case against UCC's decision to begin experiments on human embryonic stem cell lines.

We've asked Dr Deirdre Madden or President Murphy - who approved this research in UCC - to debate these experts. Let's see if they can rise to the challenge.
