

**THIS IS BABY CHOICE
A LITTLE GIRL
KILLED BY ABORTION**

KEEP IRELAND ABORTION FREE

This baby's life was ended mid-way through pregnancy. The procedure used is saline, in which a concentrated salt solution was injected into the mother's womb. The baby breathed in and swallowed this poison. The salt also caused extreme pain as it burned off a layer of the child's skin.

According to one victim, "I had a saline abortion and felt my baby thrash inside me for over an hour." In addition to the health hazards to women, saline abortion has caused live births. The grasping baby is then left to die, or is disposed of in some other distasteful way.

The gruesome reality is clear, we cannot tolerate "a little bit of abortion." Is this the kind of society we want for Ireland and for her children?
