

CHILD ABUSE! - Just the word makes us recoil. How could anyone intentionally cause pain to an innocent, helpless child? And yet, it goes on legally, 50 million times a year all over the world.

Abortion is referred to as a 'choice.' But for every woman who makes that choice there is another person who pays the price - her unborn baby. And that price is usually a horribly painful death.

The baby girl on the front cover died in a Saline Abortion. When an unborn baby is four months or older this type of abortion is used. A large needle is inserted into the fluid surrounding the baby. Some of this fluid is removed and then replaced with a concentrated salt solution. The baby chokes and gasps as it swallows the poison. The salt slowly burns the outside layers of the baby's skin. The pain is excruciating. Often the baby convulses as it trashes about, struggling for its life. It may take as long as two hours for the baby to die.

A relatively new abortion technique used to kill unborn babies from 4 to 9 months gestation is **D & X (Dilatation and Extraction)**. The abortionist uses ultrasound to see how the baby is lying in the womb. He inserts forceps through the cervical canal into the uterus and grasps one of the baby's legs, positioning the baby feet first, face down. The child's body is then pulled out of the birth canal except for his head which is too large. The baby is alive, his legs and arms kicking. The abortionist jams a blunt tipped surgical scissors into the base of the baby's neck and spreads the tips apart to enlarge the hole. A suction catheter is then

inserted into the baby's skull and the brain is sucked out. One abortionist boasted to the L.A. Times that D&X abortions at 32 weeks (8 months) were his 'speciality' and his 'passion.' Imagine the pain this baby must feel!

The most common method of abortion in the 4th, 5th and 6th month of pregnancy is called **D&E (Dilation and Evacuation)**. The cervical opening is stretched and special tools are inserted to dismember the baby. The abortionist grabs an arm or leg and literally tears it from the baby's body. The torture continues until the baby is completely dismembered. The skull is then crushed and the broken body is removed piece by piece.

Do you want this to happen in Ireland? If the answer is NO; then join Youth Defence and defend life. Save our future mothers and their babies from this deadly and cruel slaughter.

Baby Teresa survived an attempted abortion at 33 weeks despite the best efforts of the abortionist to kill her.

This baby girl is a victim of **CHILD ABUSE!**

She was scalded with a toxic chemical. She was forced to ingest deadly poison. She writhed in agony for hours before she died. She was thrown in a bucket and dumped out with the garbage.

**She is a
victim of
ABORTION**
